TOXICOLOGY

CONTENTS

Volume 50

Review Paper

Aspartame: Review of recent experimental and observational data
by P.J.C.M. Janssen and C.A. van der Heijden (Bilthoven, The Netherlands) 1–26

Research Papers

High concentration of pancreatic metallothionein in normal mice (**Metallothionein is a major zinc-binding protein in the mouse pancreas**)
by S. Onosaka, K.-S. Min, Y. Fujita, K. Tanaka, S. Iguchi and Y. Okada (Kobe, Japan) 27–35

Potentiation of evoked adrenal catecholamine release by cyanide: Possible role of calcium (**Cyanide blocks calcium efflux, perhaps as a consequence of peroxidation of membrane lipids**)
by J.L. Borowitz, G.S. Born and G.E. Isom (West Lafayette, IN) 37–35

Effect of dimethylthiourea on plasma paraquat concentration (**DMTU administration is associated with increased plasma paraquat concentrations**)
by R.D. Fairshter, N.D. Vaziri, S.A. Crosby, L. Rosario, J.A. Toohey and T.R. Ulich (Orange, CA) 47–56

Olfactory and hepatic changes following inhalation of 3-trifluoromethyl pyridine in rats (**A specific "all or none" response of the olfactory epithelium is described**)
by B.A. Gaskell, P.M. Hext, G.H. Pigott, M.C.H. Hodge and D.J. Tinston (Macclesfield, U.K.) 57–68

Respiratory tract lesions in F344/N rats and B6C3F$_1$ mice after inhalation exposure to 1,2-epoxybutane (**Inflammatory and degenerative lesions were found in the nasal passages of both species, neoplastic lesions in nasal passages and lungs of rats**)
by J.K. Dunnick, S.L. Eustis, W.W. Piegorsch and R.A. Miller (Research Triangle Park, NC and Richland, WA) 69–82

Periodic response difference in mouse epidermis chronically-exposed to crude-oils or BaP: Males vs. females (**An analysis of sex differences in a skin painting study is given**)
by J.S. Wilson and L.M. Holland (Los Alamos, NM) 83–94

Effects of piperonyl butoxide on halothane hepatotoxicity and metabolism in the hyperthyroid rat (**Halothane hepatotoxicity is potentiated by piperonyl butoxide and results through an as yet unidentified metabolic pathway or through the parent compound**)
by A.C. Smith, S.M. Roberts, L.M. Berman, R.D. Harbison and R.C. James (McLean, VA, Little Rock, AR and Nashville, TN) 95–105

Demonstration of residual bone marrow effect in mice exposed to ethylene glycol monomethyl ether (**Mice exposed to EMMGE were more sensitive to irradiation and marrow recovery was slower than in controls**)
by H.L. Hong, M. Silver and G.A. Boorman (Research Triangle Park, NC) 107–115

Announcement 117

Contents of journals relating to Toxicology 119–129

Comparison of daily and seasonal exposures of young monkeys to ozone (**Long-term effects of oxidant air pollutants may be more dependent upon the sequence of polluted and clean air than on the total number of days in pollution**)
by W.S. Tyler, N.K. Tyler, J.A. Last, M.J. Gillespie and T.J. Barstow (Davis, CA) 131–144

Comparative toxicity of nickel oxide, nickel sulfate hexahydrate, and nickle subsulfide after 12 days of inhalation exposure to F344/N rats and B6C3F$_1$ mice (**The toxicity ranking was nickel sulfate hexahydrate, nickel subsulfide and nickel oxide**)
by J.K. Dunnick, J.M. Benson, C.H. Hobbs, F.F. Hahn, Y.S. Cheng and A.F. Eidson (Research Triangle Park, NC and Albuquerque, NM) 145–156

Immediate rise in intracellular calcium and glycogen phosphorylase *a* activities upon acetaminophen covalent binding leading to hepatotoxicity in mice (**Damage to calcium control mechanisms may be an early and decisive event in drug-induced cell death**)
by G.B. Corcoran, J.A. Bauer and T.-W. David Lau (Buffalo, NY)..... 157–167

Inhibitory effect of zinc-protoporphyrin on the induction of heme oxygenase and the associated decrease in cytochrome *P*-450 content in rats (**It is suggested that induction of heme oxygenase is an important early event which consequently leads to the decrease in *P*-450 content and associated enzyme activities**)
by Y. Matsuura, T. Fukuda, T. Yoshida and Y. Kuroiwa (Tokyo, Japan)..... 169–180

DNA alkylation by 1,2-dimethylhydrazine in the rat large intestine and liver: influence of diet and enzyme induction (**There seem to be indications for an increase in carcinogen-induced DNA-lesions by dietary inducers**)
by A.M. Tacchi-Bedford, G.D. Whyman and A.E.M. McLean (London, UK)..... 181–191

Skeletal changes in multiparous mice fed a nutrient-sufficient diet containing cadmium (**Cadmium has greater effects on the skeleton of pregnant or lactating mice than in non-pregnant controls**)
by M.H. Bhattacharyya, B.D. Whelton, D.P. Peterson, B.A. Carnes, E.S. Moretti, J.M. Toomey and L.L. Williams (Argonne, IL; Cheney, WA; Ithaca, NY and East Lansing, MI)..... 193–204

Kidney changes in multiparous mice fed a nutrient-sufficient diet containing cadmium (**Cadmium-induced skeletal changes appear to be independent of cadmium-induced renal dysfunction**)
by M.H. Bhattacharyya, B.D. Whelton, D.P. Peterson, B.A. Carnes, M.S. Guram and E.S. Moretti (Argonne, IL; Cheney, WA and Denmark, SC)..... 205–215

$HgCl_4$-induced cell injury. Differential effects on membrane-located transport systems in unfertilized and fertilized sea urchin eggs (**There are different modes of $HgCl_4$ interferencce with amino acid transport**)
by D. Allemand, G. de Renzis, P. Payan, J.-P. Girard and R. Vaissiere (Monaco, Principality of Monaco and Nice, France)..... 217–230

Methylation status and organization of the metallothionein-I gene in livers and testes of strains of mice resistant and susceptible to cadmium (**No major differences were found in copy number or gross genomic structure to explain genetic resistance or susceptibility**)
by M.R. Bhave, M.J. Wilson and M.P. Waalkes (Frederick MD) 231–245

Effect of mercuric chloride on microbicidal activities of human polymorphonuclear leukocytes (**Mercuric chloride in sub-cytotoxic concentrations impairs formation of reactive oxygen species and phagocytosis**)
by B. Baginski (Düsseldorf, FRG) 247–256

Effects of glutathione depletion and induction of metallothioneins on the cytotoxicity of an organic hydroperoxide in cultured mammalian cells (**Metallothionein may act as a scavenger for reactive radical species which are formed in an iron-dependent manner**)
by T. Ochi (Kanagawa, Japan) 257–268

Acute and subacute effects of miconazole nitrate on hepatic styrene oxide hydrolase and cytochrome *P*-450-dependent monooxygenase activities in male and female AKR/J mice (Possibly a metabolite of miconazole is responsible for the inhibition of benzphetamine *N*-demethylase)
by M.O. James (Gainesville, FL) 269–281

Induction of the rat hepatic microsomal mixed-function oxidase by 3 imidazole-containing antifungal agents: selectivity for the cytochrome *P*-450IIB and *P*-450III families of cytochromes *P*-450 (Antifungals induce the phenobarbital-inducible cytochrome *P*-450 in rats)
by A.D. Rodrigues, P.R. Waddell, E. Ah-Sing, B.A. Morris, C.R. Wolf and C. Ioannides (Surrey and Edinburgh, UK) 283–301

The effects of cadmium, copper or zinc on formation of embryonic chick bone in tissue culture (Cd and Cu inhibit bone matrix formation, whereas Zn inhibits calcification)
by T. Kaji, R. Kawatani, M. Takata, T. Hoshino, T. Miyahara, H. Kozuka and F. Koizumi (Toyama, Japan) 303–316

Alterations in retinoid concentrations in several extrahepatic organs of rats by 3,4,3′,4′-tetrachlorobiphenyl (The polychlorinated biphenyl reduces the concentrations of retinoids in liver, lung and heart)
by A. Brouwer, A. Kukler and K.J. van den Berg (Rijswijk, The Netherlands) 317–330

Lung and systemic thiol homeostasis during an acute lung inflammation in the rat (There is an increase in pulmonary GSH and cysteine while liver GSH falls)
by I.A. Cotgreave, U. Johansson, P. Moldéus and R. Brattsand (Stockholm and Lund, Sweden) 331–343

Contents of journals relating to Toxicology 345–347

Subject Index Volume 50 349–352
